### PC Cheats

---

Let's start off with the PC version of the game. So, first you have to hit the "~" button which is located on the left of your number 1 button, above the Tab button. This would open up the developer console. There you would be able to enter these codes, depending on your preferences as they give out different effects:

**TGM** - Toggles God mode (You are invincible!)

**TCL** - Toggles No-clip mode (Flying like a bird is possible now and you can even walk through walls!)

**(Click on a door, or chest, then type) Unlock** - Unlocks locked things. Make sure no entity is selected. This cheat makes you an instant God at lockpicking!

**psb** - Give all spells, shouts and powers to player

**player.advlevel** - Force a Level Up (No perk points added)

**caqs** - Complete all Quest Stages

**Player.additem XXXXXXXX "###"** - Adds items based on Item Codes (the codes will be shown after this section of the guide), where XXXXXXXX is the item code, and ### is the amount you want. Examples are shown below:

player.additem 0000000f "999" - Add 999 Gold

player.additem 0000000a "100" - Add 100 Lockpicks

**player.modav carryweight 100** - Carry 100 more before overencumbered, you can change healthpoints ("Health"), magic("Magic") and skills (e.g.: "onehanded") the same way.

**kill** - Kills the selected NPC immediately. Does not work on flying dragons.

So, in accordance to the **Player.additem XXXXXXXX "###"** cheat where you have to input a specific code to gain whatever you desire, the list of Item Codes are shown below:
